Rates are based on End Results data from a series of hospital registries and one population-based registry. Rates are from the SEER Program. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients through 1997.

S

The difference in rates between 1974-76 and 1989-96 is statistically significant ($p < .05$).

[†]

The standard error of the survival rate is between 5 and 10 percentage points.

^{††}

The standard error of the survival rate is greater than 10 percentage points.

-

Statistic could not be calculated.
