^a

Rates are based on End Results data from a series of hospital registries and one population-based registry.

^b

Rates are from the SEER Program. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients through 1994.

S

The difference in rates between 1974-76 and 1986-93 is statistically significant ($p < .05$).

[†]

The standard error of the survival rate is between 5 and 10 percentage points.

^{††}

The standard error of the survival rate is greater than 10 percentage points.

-

Statistic could not be calculated.

* NCHS public use tape. Rates are per 100,000 and are age-adjusted to the 1970 U.S. standard population.

SE Standard error of the rate.

PD Percent difference between state rate and total U.S. rate.

* Absolute difference between state rate and total U.S. rate is 15% or more.

 \oplus Difference between state rate and total U.S. rate is statistically significant ($p \leq .0002$).

Note: San Jose-Monterey and Los Angeles are new SEER areas as of 1992 and their data are only used in this table and not other tables in this section.

§ SEER Program. Incidence rates are per 100,000 and are age-adjusted to the 1970 U.S. standard population.

* NCHS public use tape. Mortality rates are per 100,000 and are age-adjusted to the 1970 U.S. standard population.

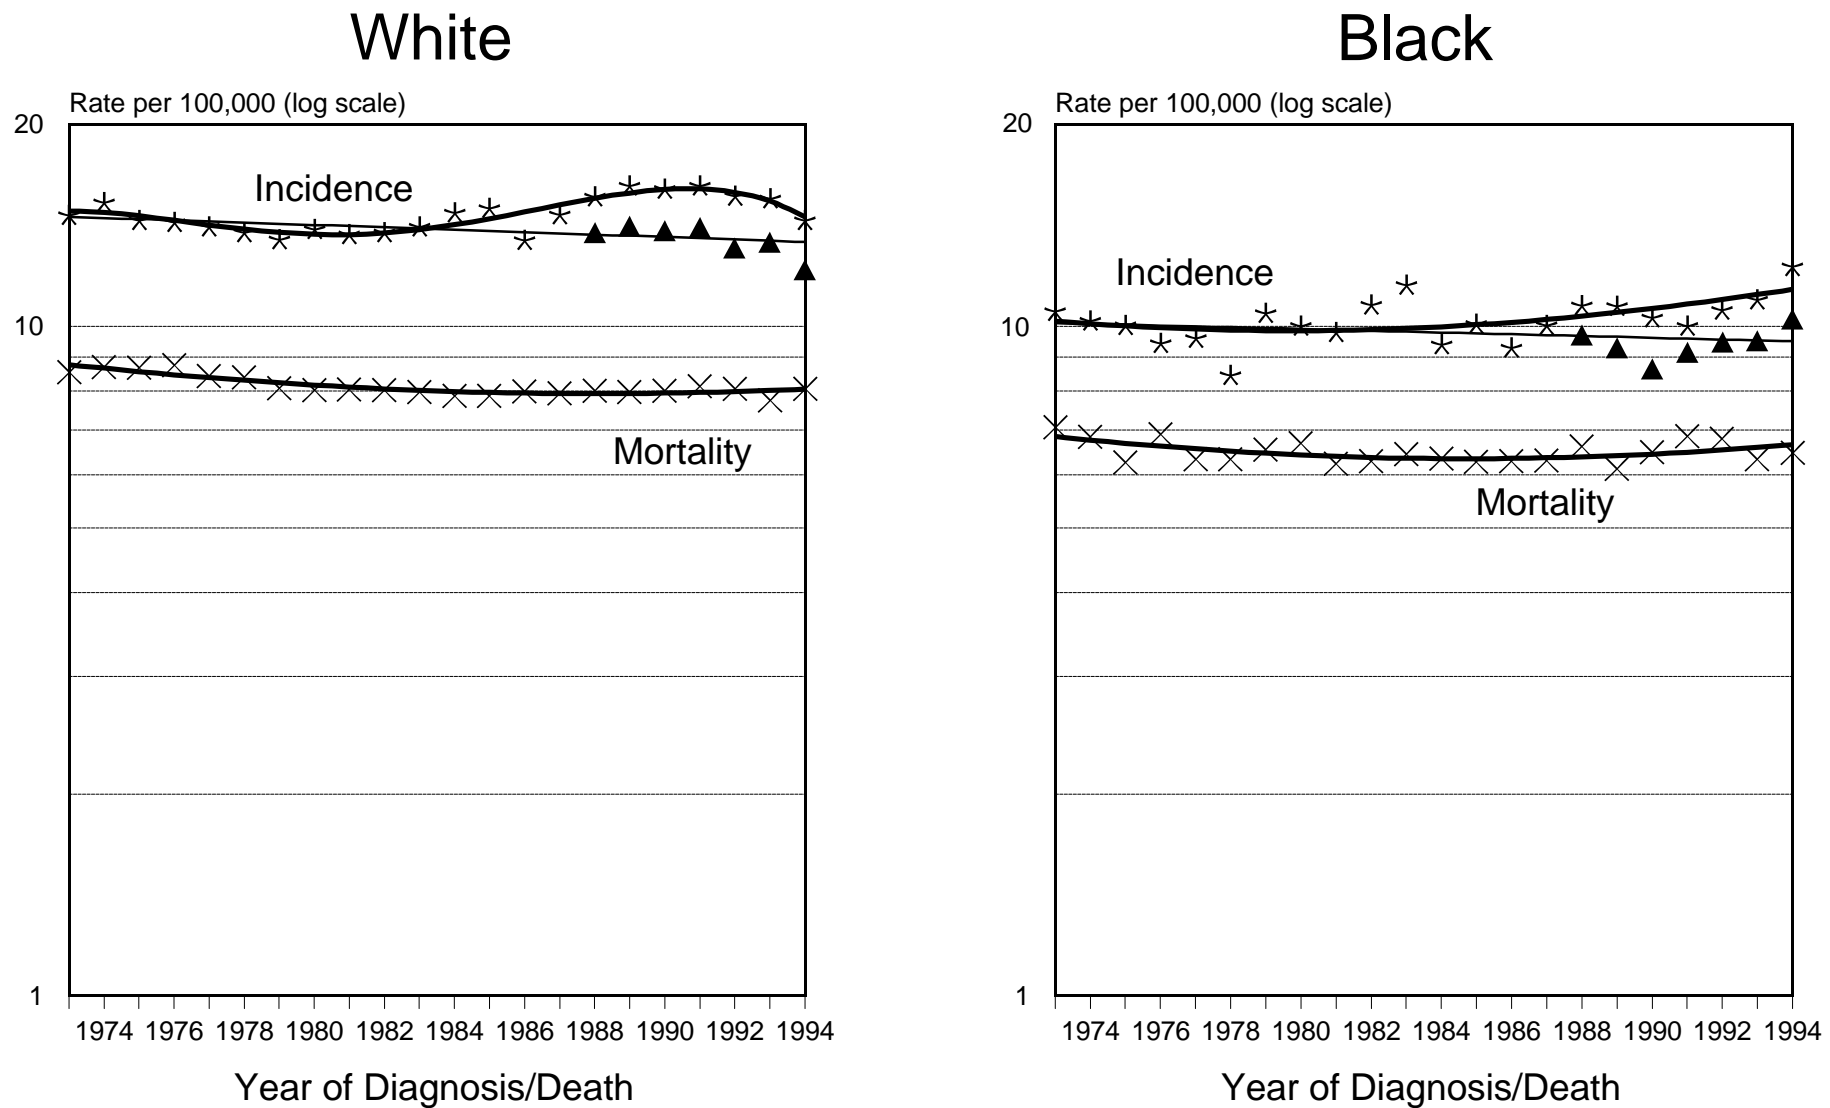

‡ Survival rates are relative rates expressed as percents and are based on follow-up of patients through 1994.

† The standard error of the survival rate is between 5 and 10 percentage points.

‡ The standard error of the survival rate is greater than 10 percentage points.

- Statistic could not be calculated or populations are inadequate.

SEER Incidence and U.S. Mortality Ovary, All Ages By Race

The Incidence trends represented by the thin line excludes histologies 8442, 8451, 8462, 8472, and 8473 which only became reportable as malignancies after 1987.

SEER Incidence and U.S. Mortality Ovary, Under 65 Years of Age By Race

The Incidence trends represented by the thin line excludes histologies 8442, 8451, 8462, 8472, and 8473 which only became reportable as malignancies after 1987.

SEER Incidence and U.S. Mortality Ovary, Ages 65 and Over By Race

The Incidence trends represented by the thin line excludes histologies 8442, 8451, 8462, 8472, and 8473 which only became reportable as malignancies after 1987.
