The APC is the Annual Percent Change based on rates age-adjusted to the 2000 U.S. standard population by 5-year age groups using the Joinpoint Regression Program.
Trends are from the SEER 9 areas.
Trends are from the NCHS public use data file.
The APC is significantly different from zero ($p < .05$).

^a Rates are based on End Results data from a series of hospital registries and one population-based registry.
^b Rates are from the SEER 9 areas. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients into 1999.
 The difference in rates between 1974-76 and 1992-98 is statistically significant ($p<.05$).
 The standard error of the survival rate is between 5 and 10 percentage points.
 The standard error of the survival rate is greater than 10 percentage points.
 Statistic could not be calculated.

^b Rates are from the SEER 9 areas. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients into 1999.

The difference in rates between 1974-76 and 1992-98 is statistically significant ($p < .05$).

The standard error of the survival rate is between 5 and 10 percentage points.

The standard error of the survival rate is greater than 10 percentage points.

Statistic could not be calculated.

^a Rates are from the SEER 9 areas.^b Rates are from the NCHS public use data file.

◊ Incidence and death rates are per 100,000 and are age-adjusted to the 2000 U.S. standard population by 5-year age groups.

Survival rates are relative rates expressed as percents.

Hispanic ^o	5.1	6.2	4.2	-0.1	0.0	-0.4

The EAPC is the Estimated Annual Percent Change over the time interval.
- Statistic not shown. Rate based on less than 25 cases for the time interval. Trend based on less than 10 cases for at least one year within the time interval.

ⁱ Incidence data are from the 12 SEER areas (San Francisco, Connecticut, Detroit, Hawaii, Iowa, New Mexico, Seattle, Utah, Atlanta, San Jose-Monterey, Los Angeles, and Alaska Native Registry).

^o Hispanic is not mutually exclusive from whites, blacks, Asian Pacific Islanders, and American Indians/Alaska Natives. Incidence data for Hispanics does not include cases from Detroit, Hawaii and Alaska Native Registry. For mortality, information is included for all states except Connecticut, Oklahoma, New York, and New Hampshire.

[♦] Mortality data are analyzed from a public use file provided by the National Center for Health Statistics (NCHS).

* The EAPC is significantly different from zero ($p < .05$).

^a NCHS public use data file. Rates are per 100,000 and are age-adjusted to the 2000 U.S. standard population by 5-year age groups.

SE Standard error of the rate.

PD Percent difference between state rate and total U.S. rate.

[⊕] Absolute percent difference between state rate and total U.S. rate is 15% or more.

[‡] Difference between state rate and total U.S. rate is statistically significant ($p \leq .0002$).

Figure XIII-1

SEER Incidence and U.S. Death Rates⁺ Leukemia

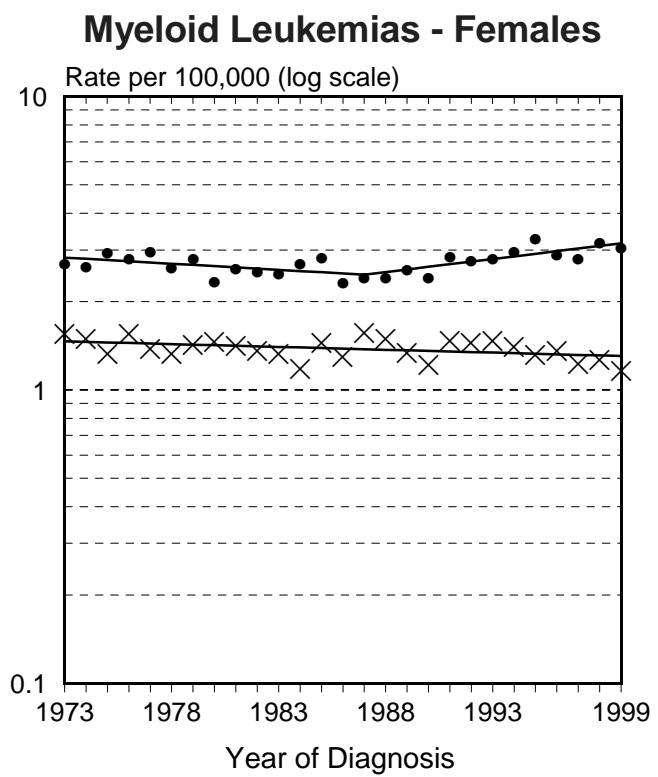

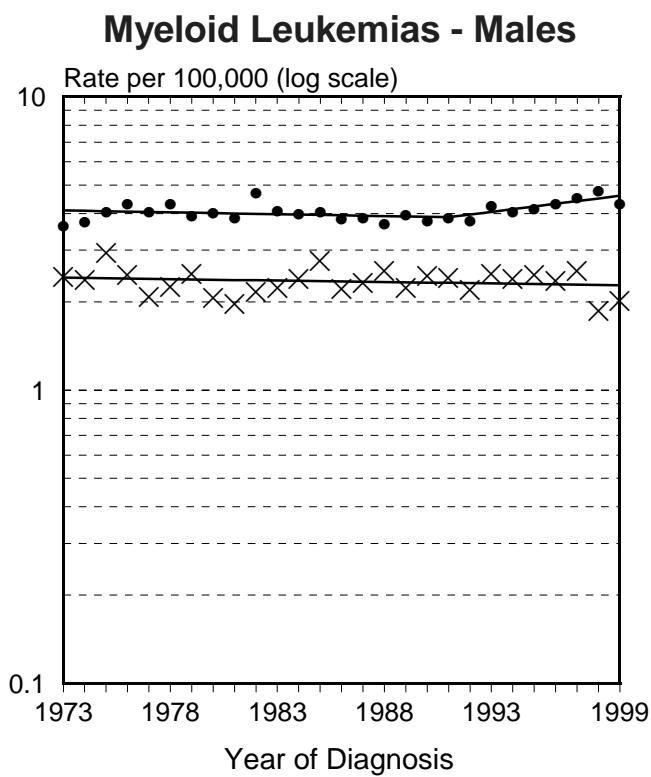

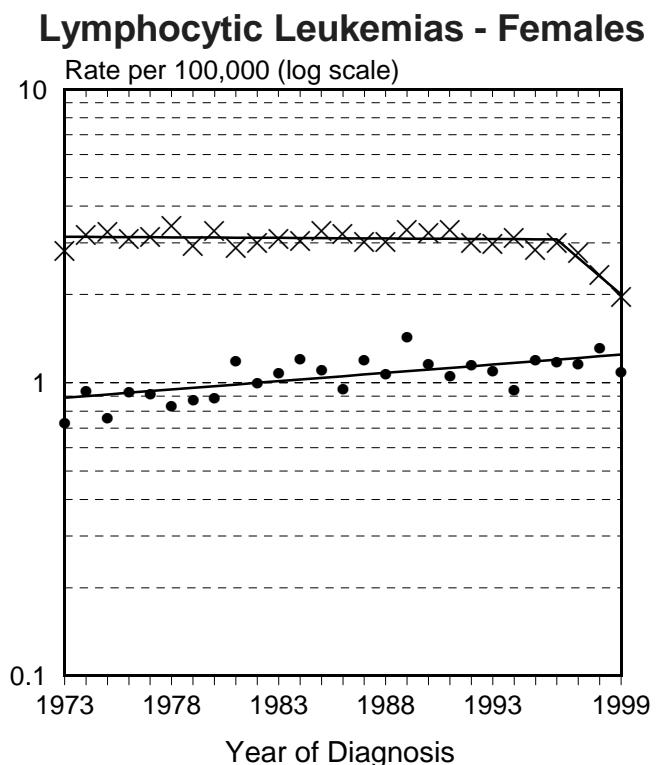

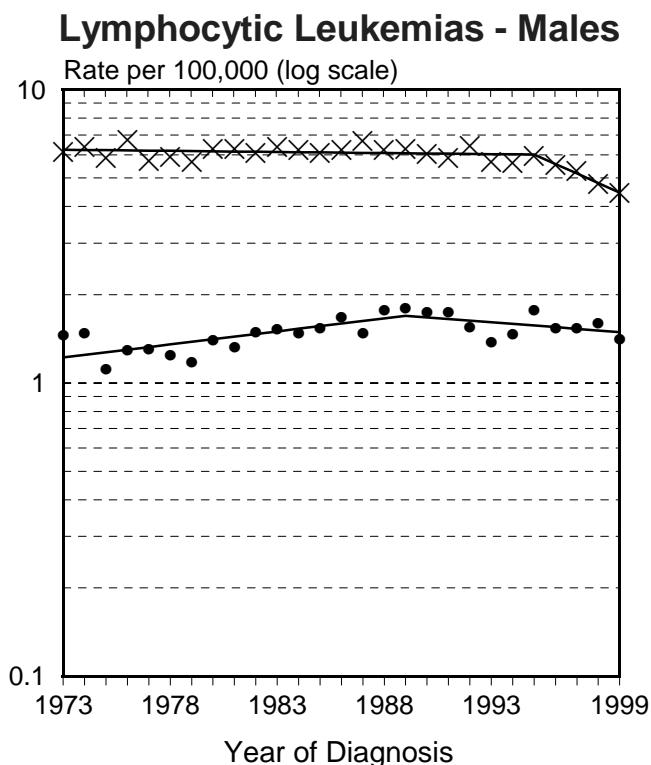

⁺ Source: SEER 9 areas and NCHS public use data file. Rates are age-adjusted to the 2000 U.S. standard million population by 5-year age groups. Regression lines are calculated using the Joinpoint Regression Program.

Figure XIII-2

SEER Incidence Rates⁺

Lymphocytic and Myeloid Leukemias

Acute and Chronic, By Sex

• Acute × Chronic

⁺ Source: SEER 9 areas. Rates are age-adjusted to the 2000 U.S. standard million population by 5-year age groups. Regression lines are calculated using the Joinpoint Regression Program.
