**SEER Incidence and Delay Adjusted Incidence Rates**

**All Cancer Sites, By Sex**

---

### Both Sexes

- **Rate per 100,000**

### Male

- **Rate per 100,000**

### Female

- **Rate per 100,000**

---

*Source: SEER 9 areas. Rates are age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1103). Regression lines and the APCs are calculated using the Joinpoint Regression Program Version 3.1, April 2006, National Cancer Institute. The APC is the Annual Percent Change for the regression line segments. The APC shown on the graph is for the most recent trend.*

*The APC is significantly different from zero (p < 0.05).*
SEER Incidence and Delay Adjusted Incidence Rates+
Both Sexes

Lung and Bronchus

- Rate per 100,000
- Year of Diagnosis: 1975 to 2003
- APC = -0.7*

Colon and Rectum

- Rate per 100,000
- Year of Diagnosis: 1975 to 2003
- APC = -2.1*
