Source: SEER 13 areas (San Francisco, Connecticut, Detroit, Hawaii, Iowa, New Mexico, Seattle, Utah, Atlanta, San Jose-Monterey, Los Angeles, Alaska Native Registry and Rural Georgia) and NCHS public use file for the total US. For sex-specific cancer sites, the population was limited to the population of the appropriate sex. Underlying rates are per 100,000 and age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1103).

The APC is the Annual Percent Change over the time interval.

* The APC is significantly different from zero (p<.05).

^ Ovary excludes borderline cases or histologies 8442, 8451, 8462, 8472, and 8473.
