SEER Observed Incidence and Delay Adjusted Incidence Rates\textsuperscript{a}
All Cancer Sites, By Sex

\textbf{Both Sexes}

\begin{itemize}
\item \textbf{Rate per 100,000}
\item \textbf{Year of Diagnosis}
\end{itemize}

\textbf{Male}

\begin{itemize}
\item \textbf{Rate per 100,000}
\item \textbf{Year of Diagnosis}
\end{itemize}

\textbf{Female}

\begin{itemize}
\item \textbf{Rate per 100,000}
\item \textbf{Year of Diagnosis}
\end{itemize}

\textsuperscript{a} Source: SEER 9 areas. Rates are age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1103). Regression lines and APCs are calculated using the Joinpoint Regression Program Version 3.3.1, April 2008, National Cancer Institute. The APC is the Annual Percent Change for the regression line segments. The APC shown on the graph is for the most recent trend. * The APC is significantly different from zero (p < 0.05).
Figure 1.22

Source: SEER 9 areas. Rates are age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1103).

Regression lines and APCs are calculated using the Joinpoint Regression Program Version 3.3.1, April 2008, National Cancer Institute.

The APC is the Annual Percent Change for the regression line segments. The APC shown on the graph is for the most recent trend.

The APC is significantly different from zero (p < 0.05).

SEER Incidence APCs
Delay Adj, 1991-2006 = -0.8*
Observed, 1991-2006 = -0.8*

SEER Incidence APCs
Delay Adj, 1998-2006 = -2.5*
Observed, 2002-2006 = -3.5*

* The APC is significantly different from zero (p < 0.05).
SEER Observed Incidence and Delay Adjusted Incidence Rates\textsuperscript{a} Males
