Figure 1.21
SEER Observed Incidence and Delay Adjusted Incidence Rates
All Cancer Sites, By Sex

Both Sexes
Rate per 100,000

Male
Rate per 100,000

Female
Rate per 100,000

Source: SEER 9 areas.

Rates are age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1103).
Regression lines and APCs are calculated using the Joinpoint Regression Program Version 4.2.0, April 2015, National Cancer Institute.
The APC is the Annual Percent Change for the regression line segments. The APC shown on the graph is for the most recent trend.
* The APC is significantly different from zero (p < 0.05).
