Joinpoint Regression Program Version 4.7, February 2019, National Cancer Institute. (<u>https://surveillance.cancer.gov/joinpoint/</u>). The APC is the Annual Percent Change based on rates age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1130).

- Trends are from the SEER 9 areas (San Francisco, Connecticut, Detroit, Hawaii, Iowa, New Mexico, Seattle, Utah, and Atlanta).
- <sup>b</sup> Trends are from the SEER 21 areas (SEER 9 areas, Los Angeles, Alaska Native Registry, Rural Georgia, California excluding
  - SF/SJM/LA, Kentucky, Louisiana, New Jersey, Georgia excluding ATL/RG, Idaho, New York and Massachusetts).
- Trends are from US Mortality Files, National Center for Health Statistics, Centers for Disease Control and Prevention.
- <sup>d</sup> The AAPC is the Average Annual Percent Change and is based on the APCs calculated by Joinpoint.
  - API Asian/Pacific Islander, AI/AN American Indian/Alaska Native, NH Non-Hispanic
    - Hispanic and Non-Hispanic are not mutually exclusive from whites, blacks, Asian/Pacific Islanders, and American Indians/Alaska Natives. Incidence data for Hispanics and Non-Hispanics are based on NHIA and exclude cases from the Alaska Native Registry. Data for American Indian/Alaska Native are based on the Purchased/Referred Care Delivery Area (PRCDA) counties.
  - The APC/AAPC is significantly different from zero (p<.05).
  - Joinpoint regression line analysis could not be performed on data series.
