Question 20000438

References:

#1: AJCC Cancer Staging Manual. 6th Edition

#2: SEER EOD-88, 3rd Ed, 146, 178

Question:

EOD-Extension/SEER Summary Stage 2000--Kidney/Eye: What codes are used to represent these fields for simultaneous bilateral Wilms tumor or simultaneous bilateral retinoblastoma?

Discussion:

Answer:

For cases diagnosed 1998-2003:

Code the EOD-Extension field to 85 [Metastasis] and the SEER Summary Stage 2000 field to 7 [Distant] for both types of tumor. Each kidney and each eye are staged separately in the AJCC, 6th ed., but for SEER we would abstract these diagnoses as one case and code the EOD and stage fields to distant to reflect the involvement of both eyes or both kidneys.

Cancer Site Category:

Retinoblastoma, Wilm's Tumor

Data Item Category:

N/A

Other Category:

N/A

Year:

2000
