Question 20010026

References:

2007 SEER Manual, C-1133. Appendix C

Question:

MP/H Rules/Histology--Prostate: What code is used to represent the histology "adenocarcinoma, microacinar type"?

Discussion:

Answer:

For cases diagnosed 2007 or later:

Assign code 8140 [adenocarcinoma, NOS]. See the MP/H rules for Other Sites, histology coding rule H10.

History:

For cases diagnosed prior to 2007:

Code the Histology field to 8550/3 [acinar cell carcinoma] because there is no ICD-O-2 or ICD-O-3 listing for microacinar. The word "type" is a term that indicates majority of a tumor. The term "microacinar" would be a term used to determine the histology code.
