

# SEER Inquiry System - Report

Produced: 05/19/2024 11:45 PM

## Question 20020018

### References:

SEER EOD-88, 3rd Ed, 8

### Question:

EOD-Lymph Nodes/EOD-Pathologic Review of Number of Regional Lymph Nodes Positive and Examined--Cervix: What codes are used to represent these fields for a cervix primary when the only information on lymph nodes is a CT of the pelvis showing "pelvic adenopathy" (no surgery was done)?

### Discussion:

### Answer:

Code the EOD-Lymph Nodes field to 9 [unknown]. Code the Pathologic Review of Number of Regional Lymph Nodes Positive field to 98 [No nodes examined] and the Lymph Nodes Examined to 00 [No nodes examined] because there was no resection of the primary organs. Adenopathy, NOS, per SEER guidelines, is not coded as lymph node involvement

### Cancer Site Category:

Lymph nodes, Cervix Uteri

### Data Item Category:

N/A

### Other Category:

N/A

### Year:

2002
