Question 20021078

References:

2004 SEER Manual, 73

Question:

Primary Site: How do you code the primary site when the tumor is identified in a bladder that was reconstructed using a stomach augmentation procedure and the pathology report states, "Bladder/prostate: adenocarcinoma arising within gastric mucosa, with the following features: highly infiltrative through the bladder wall"?

Discussion:

Answer:

Code the Primary Site field to bladder [C67.9]. Code the location of the tumor as the primary site.

Cancer Site Category:

N/A

Data Item Category:

Primary site

Other Category:
