Question:

EOD/Surgery of Primary Site--Melanoma: If a melanoma primary site is other than skin, vulva, penis, or scrotum should these fields be coded using melanoma schemes? See discussion.

Discussion:

Should a melanoma of the cervix be coded using the melanoma or the cervix schemes for these fields?

Answer:

For cases diagnosed 1998-2003: Use the EOD and surgery code schemes for cervix uteri. The EOD scheme for melanoma excludes melanoma of the cervix uteri. The surgery code scheme for skin excludes cervix uteri.

Cancer Site Category:

Melanoma

Data Item Category:

Surgery of Primary Site

Other Category:

N/A

Year:

2003
