Question 20031008

References:

Hist Typing of Kidney Tumors, 11. Second Edition

Question:

Histology (Pre-2007)--Kidney: Is 8316/3 [Cyst associated renal cell carcinoma] the appropriate code for 1) Cystic renal cell carcinoma, 2) Renal cell carcinoma mass with cystic areas and 3) Cystic renal cell carcinoma, clear cell type?

Discussion:

Answer:

For tumors diagnosed prior to 2007:

Yes, ICD-O-3 histology code 8316 is the correct code for the three examples above.

There are two categories of cyst-associated renal cell carcinomas: Renal cell carcinoma originating in a cyst, and Cystic renal cell carcinoma.

For tumors diagnosed 2007 or later, refer to the MP/H rules. If there are still questions about how this type of tumor should be coded, submit a new question to SINQ and include the difficulties you are encountering in applying the MP/H rules.

Cancer Site Category:

Kidney, renal pelvis

Data Item Category:

Histology

Other Category:

N/A

Year:

2003
