Question 20041016

References:

2004 SEER Manual, C-560

Question:

CS Site Specific Factor 4--Prostate: If PAP is not mentioned in the chart, should Site Specific Factor 4 be coded to 999 [unknown or no information] or 000 [test not done]?

Discussion:

Answer:

This answer was provided in the context of CSv1 coding guidelines. The response may not be used after your registry database has been converted to CSv2. For tumors diagnosed 2004 only:

Code the CS Site Specific Factor 4 to 999 [Unknown or no information; Not documented in patient record]. If there is no report of a lab test in the health record, code as 999.

Code this field to 000 [Test not done] when there is a statement in the record that a test was not performed.

Tumors diagnosed 1/1/2005 forward no longer have PAP coded in the Site Specific Factor 4 field.

Cancer Site Category:

Prostate
