Question 20051038

References:

2004 SEER Manual, 169-171

Question:

First Course Treatment--Prostatic Urethra: Is Lupron coded for a papillary carcinoma of the prostatic urethra that is treated with a TUR with fulguration and beam radiation even though the prostate biopsies are negative?

Discussion:

Answer:

Do not code lupron as treatment for a primary in the prostatic urethra.
