Question 20061014

References:

2004 SEER Manual, C-393

Question:

Surgery of Primary Site--Lung: Is this field coded to 30 [Resection of lobe or lobectomy] or 33 [Lobectomy with mediastinal lymph node dissection] when a lobectomy specimen includes 2 AP window lymph nodes? See Discussion.

Discussion:

LUL lobectomy: 1.7cm apical tumor, DX=mod well diff subpleural SCC, with involvement of pleural surface. 3 peribronchial LN neg and 2 AP window LNs neg. Stage T2N0.

1. No lymph node dissection or sampling was stated to be done

2. The lobectomy specimen contained the LNs

3. Scope of regional LN surgery is coded

Would the surgery to primary site code 30 or 33?

Answer:

Code surgery of primary site to 30 [Resection of lobe or lobectomy]. According to the information provided, there was no lymph node dissection in this case. The 2 AP window nodes were obtained as part of the lobectomy specimen.
