Question 20061042

References:

2004 SEER Manual, 169

Question:

First Course Treatment--Lymphoma: Should the use of proton pump inhibitors be coded as treatment for lymphoma primaries in patients with H Pylori?

Discussion:

Answer:

No, do not code proton pump inhibitors as treatment. These are used for gastric acid suppression. Proton pump inhibitors are used to treat symptoms, not the lymphoma itself.

Cancer Site Category:

Lymphoma

Data Item Category:

First course treatment
