## Question 20061068

### References:

ICD-O-3

### Question:

Primary Site--Unknown & ill-defined site: Should the primary site be coded to C809 [Unknown primary site] or C761 [Thorax, NOS] if the patient died following a limited work-up that included on a cytology on pericardial fluid that was positive for poor differentiated adenocarcinoma?

### Discussion:

### Answer:

Based on the information provided, code the primary site to C809 [Unknown primary site]. There is not enough information provided to suggest that the primary site is the thorax or any other location.

### Cancer Site Category:

Unknown & ill-defined sit

### Data Item Category:

Primary site

### Other Category:

N/A

### Year:

2006
