## Question 20061087

### References:

#1: ICD-O-3

#2: 2004 SEER Manual, 1

### Question:

Reportability--Melanoma: Is the following reportable? See Discussion.

### Discussion:

PATH: Skin, Lt back exc bx: compound nevus with severe cytoarchitectural atypia and regression. Comment: due to overlap of morphology between MM and nevi with severe atypia, and since there's evidence of regression, consideration for re-excision may be considered if clinically indicated.

### Answer:

The final diagnosis, compound nevus with severe atypia, is not reportable. This diagnosis is not listed in ICD-O-3.

### Cancer Site Category:

Melanoma

### Data Item Category:

N/A

### Other Category:

Reportability
