## Question 20110153

### References:

Heme & Lymph Manual & DB, Appendix F

### Question:

Reportability--Heme & Lymphoid Neoplasms: Is macrocytic anemia reportable?

### Discussion:

### Answer:

For cases diagnosed 2010 and forward, access the Hematopoietic Database at <http://seer.cancer.gov/seertools/hemelymph>.

Macrocytic anemia is not reportable. Anemia refers to a condition of having a low count of red blood cells. The term "macrocytic" refers to the enlarged size of the red blood cells. Macrocytic anemia is usually caused by vitamin deficiencies, alcohol use, medications or thyroid disorders.

See Appendix F: Non-Reportable List for Hematopoietic Diseases.

SEER\*Educate provides training on how to use the Heme Manual and DB. If you are unsure how to arrive at the answer in this SINQ question, refer to SEER\*Educate to practice coding hematopoietic and lymphoid neoplasms. Review the step-by-step instructions provided for each case scenario to learn how to use the application and manual to arrive at the answer provided. <https://educate.fhcrc.org/LandingPage.aspx> (<https://educate.fhcrc.org/LandingPage.aspx>).
