## Question 20130077

### References:

#1: Heme & Lymph Manual & DB

#2: 2012 SEER Manual

### Question:

Reportability--Heme & Lymphoid Neoplasm: What is the histology code if a myeloproliferative disorder is reportable should a physician suspect this diagnosis and treats the patient? See Discussion.

### Discussion:

Physician suspects patient has a myeloproliferative disorder and treats her with a phlebotomy and Hydrea. Patient receives Hydrea during an inpatient stay, but does not see the Heme/Onc again. The patient is subsequently only seen by a Palliative Medicine physician who also states she has an underlying myeloproliferative disorder. The patient died while an inpatient.

### Answer:

For cases diagnosed 2010 and forward, access the Hematopoietic Database at <http://seer.cancer.gov/seertools/hemelymph>.

This is a reportable diagnosis and should be accessioned with the histology coded to 9975/3 [myelodysplastic/myeloproliferative neoplasm, unclassifiable].

The term is a reportable ambiguous term per the Hematopoietic Coding Manual (Case Reportability Instructions, Rule 4). Also, the patient was treated for a myeloproliferative disorder, making this a reportable clinical diagnosis per the SEER Manual (Reportability, Pg 4, Exception 1).

Myeloproliferative disorder is synonymous with myeloproliferative disease. Myeloproliferative disease is listed as an alternate name for myelodysplastic/myeloproliferative neoplasm, unclassifiable.

SEER\*Educate provides training on how to use the Heme Manual and DB. If you are unsure how to arrive at the answer in this SINQ question, refer to SEER\*Educate to practice coding hematopoietic and lymphoid neoplasms. Review the step-by-step instructions provided for each case scenario to learn how to use the application and manual to arrive at the answer provided. <https://educate.fhcrc.org/LandingPage.aspx> (<https://educate.fhcrc.org/LandingPage.aspx>).
