Question 20190079

References:

2018 SEER Manual. Appendix E

Question:

Reportability/Histology--Pancreas: Is mucinous cystic neoplasm of pancreas reportable?

Discussion:

Answer:

Non-invasive mucinous cystic neoplasm (MCN) of the pancreas with low or intermediate grade dysplasia is NOT reportable.

Non-invasive mucinous cystic neoplasm (MCN) of the pancreas with high grade dysplasia is reportable. For neoplasms of the pancreas, the term MCN with high grade dysplasia replaces the term mucinous cystadenocarcinoma, non-invasive.
