

# SEER Inquiry System - Report

Produced: 12/01/2022 7:19 PM

## Question 20220007

---

### Inquiry Details

#### References:

#### Question:

Histology: Is there any guidance on using STRATA Oncology testing (molecular tumor profiling tests), such as StrataNGS and StrataEXP, to code SSDIs, histology, etc? I do not see anything in STR, SEER Program Manual, SING, or CAnswerForum. We are seeing the testing with our 2021 paths.

#### Discussion:

#### Answer:

We recommend that you do not use information from these molecular tumor profiling tests until they become a standard diagnostic tool. If/when that happens, we will add information to the various manuals.
