

**Cutaneous Melanoma Multiple Primary Rules – Matrix**  
**C440 – C449**  
**(Excludes melanoma of any other site)**

\* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.  
 \*\* Prepare two or more abstracts. Use the histology coding rules to assign the appropriate histology code to each case abstracted.

Rule	Site	Histology	Timing	Behavior	Notes/Examples	Primary
<b>UNKNOWN IF SINGLE OR MULTIPLE MELANOMAS</b>					Melanoma(s) not described as metastasis	
<b>M1</b>					Use this rule only after all information sources have been exhausted.	Single*
<b>SINGLE MELANOMA</b>					<i>1:</i> Melanoma not described as metastasis <i>2:</i> Includes combinations of in situ and invasive	
<b>M2</b>	Single					Single*
<b>MULTIPLE MELANOMAS</b> Multiple melanomas may be a single primary or multiple primaries					<i>1:</i> Melanoma not described as metastases <i>2:</i> Includes combinations of in situ and invasive	
<b>M3</b>	Topography codes are different at the second (C <u>x</u> xx), third (Cx <u>x</u> x) or fourth (Cx <u>xx</u> ) character					Multiple**
<b>M4</b>	Different laterality				A <b>midline</b> melanoma is a different laterality than right or left. <i>Example 1:</i> A melanoma on the right side of the chest and a melanoma at midline on the chest are different laterality, multiple primaries. <i>Example 2:</i> A melanoma on the right side of the chest and a melanoma on the left side of the chest are multiple primaries.	Multiple**
<b>M5</b>		Histology codes are different at the first ( <u>x</u> xxx), second (x <u>x</u> xx), or third (xx <u>x</u> x) number				Multiple**

**Cutaneous Melanoma Multiple Primary Rules – Matrix**  
**C440 – C449**  
**(Excludes melanoma of any other site)**

<b>Rule</b>	<b>Site</b>	<b>Histology</b>	<b>Timing</b>	<b>Behavior</b>	<b>Notes/Examples</b>	<b>Primary</b>
<b>M6</b>			More than 60 days after diagnosis	An invasive melanoma following an in situ melanoma	<p><b>1:</b> The purpose of this rule is to ensure that the case is counted as an incident (invasive) case when incidence data are analyzed.</p> <p><b>2:</b> Abstract as multiple primaries even if the medical record/physician states it is recurrence or progression of disease.</p>	Multiple**
<b>M7</b>			Diagnosed more than 60 days apart			Multiple**
<b>M8</b>	Does not meet any of the above criteria				<p><b>1:</b> Use the data item “Multiplicity Counter” to record the number of melanomas abstracted as a single primary.</p> <p><b>2:</b> When an invasive melanoma follows an in situ melanoma within 60 days, abstract as a single primary.</p> <p><b>3:</b> All cases covered by this rule are the same site and histology.</p> <p><b>Rule M8 Examples</b>  The following are examples of the types of cases that use Rule M8. This is NOT intended to be an exhaustive set of examples; there are other cases that may be classified as a single primary.</p> <p><b>Warning: Using only these case examples to determine the number of primaries can result in major errors.</b></p> <p><b>Example 1:</b> Solitary melanoma on the left back and another solitary melanoma on the left chest</p> <p><b>Example 2:</b> Solitary melanoma on the right thigh and another solitary melanoma on the right ankle</p>	Single*
