Renal Pelvis, Ureter, Bladder and Other Urinary Multiple Primary Rules - Flowchart
(C659, C669, C670-C679, C680-C689)
(Excludes lymphoma and leukemia M9590-9989 and Kaposi sarcoma M9140)

* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.
** Prepare two or more abstracts. Use the histology coding rules to assign the appropriate histology code to each case abstracted.

unknown if single or multiple tumors

M1
Is it impossible to determine if there is a single tumor or multiple tumors?

YES
SINGLE Primary*

NO

Go to Single Tumor or Multiple Tumors

End of instructions for Unknown if Single or Multiple Tumors

SINGLE TUMOR

M2
Is there a single tumor?

YES
SINGLE Primary*

NO

Go to Multiple Tumors.

End of instructions for Single Tumor.

NOTES

Tumor(s) not described as metastasis.

Use this rule only after all information sources have been exhausted.

1. Tumor not described as metastasis.
2. Includes combinations of in situ and invasive.

The tumor may overlap onto or extend into adjacent/contiguous site or subsite.

* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.

** Prepare two or more abstracts. Use the histology coding rules to assign the appropriate histology code to each case abstracted.

1. Tumors not described as metastases.
2. Includes combinations of in situ and invasive.

Use this rule and abstract as a multiple primary unless documented to be metastatic.

Use this rule and abstract as a multiple primary unless documented to be metastatic.

1. The purpose of this rule is to ensure that the case is counted as an incident (invasive) case when incidence data are analyzed.
2. Abstract as multiple primaries even if the medical record/physician states it is recurrence or progression of disease.
Are there urothelial tumors (See Table 1) in two or more of the following sites:
- Renal pelvis (C659)?
- Ureter (C669)?
- Bladder (C670-C679)?
- Urethra/prostatic urethra (C680)?

Are there tumors diagnosed more than three (3) years apart?

Are there bladder tumors with any combination of the following histologies:
- papillary carcinoma (8050)
- transitional cell carcinoma (8120-8124)
- papillary transitional cell carcinoma (8130-8131)?
