

NAACCR/NCCR Number	NCCR Name	NAACCR/NCCR XML ID	NCCR Item description	Code description	Comments
40	Registry ID	registryId	A unique code that represents the data transmission source.	Right justified, zero filled	
20	Patient ID Number	patientIdNumber	Unique number assigned to an individual patient by the central registry. The central registry will assign this same number to all of the patient's subsequent tumors (records).	Right justified, zero filled	
60	Tumor Record Number	tumorRecordNumber	This is a unique number that identifies a specific tumor so data can be linked.	Right justified, zero filled	Will be populated for data that could be linked at tumor level
	Radiation Treatment Start Date	radiationTreatmentStartDate	Date of radiation treatment start	Full date	
	Radiation Treatment End Date	radiationTreatmentEndDate	Date of radiation treatment end	Full date	
	Radiation Anatomic Site	radiationAnatomicSite	Anatomic site or region that radiation is delivered to.	String	
	Radiation Therapy Type	radiationTherapyType	The type of treatment by means of exposure of the target or the whole body to radiation.	String	
	Radiation Energy Type	radiationEnergyType	Type of radiation delivered to the patient.	String	
	Dose Delivered	doseDelivered	Total radiation dose delivered	Exact grays	If submitted in centigrays, will be converted from centigrays to grays after submission
	Fractions Delivered	fractionsDelivered	Total number of fractions or divided doses that were delivered to the patient	Total fractions	

NAACCR/NCCR Number	NCCR Name	NAACCR/NCCR XML ID	NCCR Item description	Code description	Comments
	Dose Prescribed	dosePrescribed	Total radiation dose prescribed	Exact grays	If submitted in centigrays, will be converted from centigrays to grays after submission
	Fractions Prescribed	fractionsPrescribed	Total number of fractions or divided doses that were prescribed to the patient	Total fractions	
	Source	source	Identifies the source of information	Numeric
