#### Submission to NCI

Please complete for each submission and email to:

[SEERSUBM-L@list.nih.gov](mailto:SEERSUBM-L@list.nih.gov), [ncibranchbinvoices@mail.nih.gov](mailto:ncibranchbinvoices@mail.nih.gov), COR, and CO.

The submission of the Attachment A form via email is sufficient as contractors also upload the data to the portal.

### STANDARD CASE TRANSMISSION FILE QUESTIONS

**NHAPIIA Options:** Registries may select one of the options listed below when executing the NHIA algorithm. The option setting affects counties in which less than 5% of the population is of Hispanic/Latino ethnicity or to include all records.

Which option did you use when running NHAPIIA?

1. Option 1 – Only run the surname portion of the algorithm only on cases reported as Spanish surname only or as unknown whether Spanish (item 190 codes 7 or 9). In this choice, the surname portion will not be run on cases coded as 0, non-Hispanic.
2. Option 2 - Run the surname portion of the algorithm only on cases with a code of 7 on data element 190 (to verify that the surname is on the list of allowable Hispanic surnames) AND convert all cases with a code of 9 (unknown if Hispanic) to a code of 0 (Not Hispanic).
3. All Records – Apply all NHIA algorithms to all records. Note: this is listed as NHAPPIA option 0 in the SEER\*DMS header information.

**SEER\*DMS Registries:** The NHAPIIA option is documented with the version information. Click the SEER\*DMS version on the home page.

## SEER 2025 SUBMISSION REQUIREMENTS AND GUIDELINES

### Attachment B

#### SEER Patient Follow-up Calculations

The last reporting year for this submission is **2024**. The percent of patients diagnosed 2004 through 2023 who have current follow-up is defined as

$$P = 100(D + A)/T$$

Where....

- A patient is counted by selecting one record per person where sequence is 00 or 01.
- D is the number of patients who have died.
- A is the number of alive patients with date of last contact on or after January 1, 2024
- T is the total number of patients. This includes A + D + the number of patients who were last known to be alive with date of last contact prior to January 1, 2024.

P can be calculated for individual years of diagnosis up through 2023 and for all years combined.

#### November Submission Requirements

Reportable cases diagnosed 2004 through 2023 followed into 2024	Contractual Standard
All invasive (includes bladder in situ)	
Age < 20 (invasive)	>=90%
Ages 20-64 (invasive)	>=90%
Ages 65+ (invasive)	>=95%
All In situ	>=90%
Benign and borderline CNS	Follow-up is expected but no contractual standards are set at this time

The Follow-Up DQP markers will be calculated on the last 20 years of diagnosis

(Reporting Year – 20) thru (Reporting Year – 1) followed into Reporting Year
