Other Sites Equivalent Terms, Definitions and Tables
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Introduction

For cases diagnosed 1/1/2007 to 12/31/2018

IMPORTANT INFORMATION ON SITES COVERED IN THIS MODULE:

For cases diagnosed 1/1/2007 to 12/31/2017:
The Other Sites rules cover rectosigmoid, rectum and all sites not included in the site-specific rules.

For cases diagnosed 1/1/2018 forward, the following sites are no longer included in the Other sites rules:
Rectosigmoid C199
Rectum C209
Peripheral Nerves and Anatomic Nervous System C470-C479

Beginning 1/1/2018, rectosigmoid (C199) and rectum (C209) primaries are included in the 2018 Colon Solid Tumor Rules
Beginning 1/1/2018, peripheral nerves (C470-C479) are included in the Malignant CNS and Peripheral Nerves Solid Tumor Rules

EQUIVALENT TERMS

Acinar adenocarcinoma, adenocarcinoma (For prostate primaries only)
Adenocarcinoma, glandular carcinoma
### Other Sites Terms and Definitions

#### Other Sites Equivalent Terms, Definitions and Tables
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Table 2 – Mixed and Combination Codes

This table is used to determine mixed and combination codes ONLY

Apply the multiple primary rules FIRST. Combination codes are most often used when multiple histologies are present in a single tumor; they are rarely used for multiple tumors. Use a combination code for multiple tumors ONLY when the tumors meet the rules for a single primary.

Use this two-page table to select combination histology codes. Compare the terms in the diagnosis to the terms in Columns 1 and 2. If the terms match, code the case using the ICD-O-3 histology code in column 4. Use the combination codes listed in this table only when the histologies in the tumor match the histologies listed below.

</table>
Other Sites Multiple Primary Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast,
Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia
For cases diagnosed 1/1/2007 to 12/31/2018

IMPORTANT INFORMATION ON SITES COVERED IN THESE MODULES:

For cases diagnosed 1/1/2007 to 12/31/2017:
The Other Sites rules cover rectosigmoid, rectum and all sites not included in the site-specific rules.

For cases diagnosed 1/1/2018 forward, the following sites are no longer included in the Other sites rules:
Rectosigmoid C199
Rectum C209
Peripheral Nerves and Anatomic Nervous System C470-C479 (Specifically rule M12)

Beginning 1/1/2018, rectosigmoid (C199) and rectum (C209) primaries are included in the 2018 Colon Solid Tumor Rules
Beginning 1/1/2018, peripheral nerves (C470-C479) are included in the Malignant CNS and Peripheral Nerves Solid Tumor Rules

UNKNOWN IF SINGLE OR MULTIPLE TUMORS

Note: Tumor(s) not described as metastasis

Rule M1 When it is not possible to determine if there is a single tumor or multiple tumors, opt for a single tumor and abstract as a single primary. *

Note: Use this rule only after all information sources have been exhausted.

* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.
This is the end of instructions for Unknown if Single or Multiple Tumors.
Other Sites Multiple Primary Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

**SINGLE TUMOR**

*Note 1:* Tumor not described as metastasis
*Note 2:* Includes combinations of in situ and invasive

**Rule M2** A single tumor is always a single primary. *
*Note:* The tumor may overlap onto or extend into adjacent/contiguous site or subsite.

* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.
This is the end of instructions for Single Tumor.

**MULTIPLE TUMORS**

Multiple tumors may be a single primary or multiple primaries.
*Note 1:* Tumors not described as metastases
*Note 2:* Includes combinations of in situ and invasive

**Rule M3** Adenocarcinoma of the prostate is always a single primary. *
*Note 1:* Report only one adenocarcinoma of the prostate per patient per lifetime.
*Note 2:* 95% of prostate malignancies are the common (acinar) adenocarcinoma histology (8140). See Equivalent Terms, Definitions and Tables for more information.
*Note 3:* If patient has a previous acinar adenocarcinoma of the prostate in the database and is diagnosed with adenocarcinoma in 2007 it is a single primary.

**Rule M4** Retinoblastoma is always a single primary (unilateral or bilateral). *

**Rule M5** Kaposi sarcoma (any site or sites) is always a single primary. *
Other Sites Multiple Primary Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule M6  Follicular and papillary tumors in the thyroid within 60 days of diagnosis are a single primary. *

Rule M7  Bilateral epithelial tumors (8000-8799) of the ovary within 60 days are a single primary. *

Rule M8  Tumors on both sides (right and left) of a site listed in Table 1 are multiple primaries. **

Note: Table 1 – Paired Organs and Sites with Laterality

Rule M9  Adenocarcinoma in adenomatous polyposis coli (familial polyposis) with one or more in situ or malignant polyps is a single primary.*

Note: Tumors may be present in a single or multiple segments of the colon, rectosigmoid, rectum.

Rule M10  Tumors diagnosed more than one (1) year apart are multiple primaries. **

Rule M11  Tumors with ICD-O-3 topography codes that are different at the second (Cxxx) and/or third characters (Cxx) are multiple primaries. **

Example 1: A tumor in the penis C609 and a tumor in the rectum C209 have different second characters in their ICD-O-3 topography codes, so they are multiple primaries.

Example 2: A tumor in the cervix C539 and a tumor in the vulva C519 have different third characters in their ICD-O-3 topography codes, so they are multiple primaries.

Rule M12  Tumors with ICD-O-3 topography codes that differ only at the fourth character (Cxx) and are in any one of the following primary sites are multiple primaries. **

- Anus and anal canal (C21_)
- Bones, joints, and articular cartilage (C40_ - C41_)
- Peripheral nerves and autonomic nervous system (C47_)
- Connective subcutaneous and other soft tissues (C49_)
- Skin (C44_)

Note: Table 1 – Paired Organs and Sites with Laterality
Other Sites Multiple Primary Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemi

Rule M13  A *frank* in situ or malignant *adenocarcinoma* and an in situ or *malignant* tumor in a *polyp* are a single primary. *

Rule M14  *Multiple* in situ and/or *malignant polyps* are a single primary. *

*Note:* Includes all combinations of adenomatous, tubular, villous, and tubulovillous adenomas or polyps.

Rule M15  An *invasive* tumor following an *in situ* tumor more than 60 days after diagnosis is a multiple primary. **

*Note 1:* The purpose of this rule is to ensure that the case is counted as an incident (invasive) case when incidence data are analyzed.

*Note 2:* Abstract as multiple primaries even if the medical record/physician states it is recurrence or progression of disease.

Rule M16  Abstract as a single primary* when one tumor is:

- *Cancer/malignant neoplasm, NOS* (8000) and another is a *specific histology* or
- *Carcinoma, NOS* (8010) and another is a *specific carcinoma* or
- *Squamous cell carcinoma, NOS* (8070) and another is *specific squamous cell carcinoma* or
- *Adenocarcinoma, NOS* (8140) and another is a *specific adenocarcinoma* or
- *Melanoma, NOS* (8720) and another is a *specific melanoma*
- *Sarcoma, NOS* (8800) and another is a *specific sarcoma*

Rule M17  Tumors with ICD-O-3 histology codes that are *different* at the first (xxxx), second (xxxx) or third (xxxx) number are multiple primaries. **

Rule M18  Tumors that *do not meet any* of the above criteria are a single primary. *

*Note:* When an invasive tumor follows an in situ tumor within 60 days, abstract as a single primary.

* Prepare one abstract. Use the histology coding rules to assign the appropriate histology code.

** Prepare two or more abstracts. Use the histology coding rules to assign the appropriate histology code to each case abstracted.

This is the end of instructions for Multiple Tumors.
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

For cases diagnosed 1/1/2007 to 12/31/2018

IMPORTANT INFORMATION ON SITES COVERED IN THESE MODULES:

For cases diagnosed 1/1/2007 to 12/31/2017:
The Other Sites rules cover rectosigmoid, rectum and all sites not included in the site-specific rules.

For cases diagnosed 1/1/2018 forward, the following sites are no longer included in the Other sites rules:
Rectosigmoid C199
Rectum C209
Peripheral Nerves and Anatomic Nervous System C470-C479

Beginning 1/1/2018, rectosigmoid (C199) and rectum (C209) primaries are included in the 2018 Colon Solid Tumor Rules
Beginning 1/1/2018, peripheral nerves (C470-C479) are included in the Malignant CNS and Peripheral Nerves Solid Tumor Rules

SINGLE TUMOR: IN SITU ONLY
(All parts are in situ)

Rule H1 Code the histology documented by the physician when the pathology/cytology report is not available.
Note 1: Priority for using documents to code the histology
- Documentation in the medical record that refers to pathologic or cytologic findings
- Physician’s reference to type of cancer in the medical record

Note 2: Code the specific histology when documented.

Note 3: Code the histology to 8000 (cancer/malignant neoplasm, NOS) or 8010 (carcinoma, NOS) as stated by the physician when nothing more specific is documented.
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule H2  Code the histology when only one histologic type is identified.

Note:  Do not code terms that do not appear in the histology description.

Example:  Do not code squamous cell carcinoma non-keratinizing unless the words “non-keratinizing” actually appear in the diagnosis.

Rule H3  Code 8210 (adenocarcinoma in adenomatous polyp), 8261 (adenocarcinoma in villous adenoma), or 8263 (adenocarcinoma in tubulovillous adenoma) when:
- The final diagnosis is adenocarcinoma in a polyp or
- The final diagnosis is adenocarcinoma and a residual polyp or polyp architecture is recorded in other parts of the pathology report or
- The final diagnosis is adenocarcinoma and there is reference to a residual or pre-existing polyp or
- The final diagnosis is mucinous/colloid or signet ring cell adenocarcinoma in a polyp or
- There is documentation that the patient had a polypectomy

Note: It is important to know that the adenocarcinoma originated in a polyp.

Rule H4  Code the most specific histologic term when the diagnosis is:
- Carcinoma in situ, NOS (8010) and a specific in situ carcinoma or
- Squamous cell carcinoma in situ, NOS (8070) and a specific in situ squamous cell carcinoma or
- Adenocarcinoma in situ, NOS (8140) and a specific in situ adenocarcinoma or
- Melanoma in situ, NOS (8720) and a specific in situ melanoma

Note: The specific histology may be identified as type, subtype, predominantly, with features of, major, with differentiation, architecture or pattern. The terms architecture and pattern are subtypes only for in situ cancer.

Rule H5  Code the appropriate combination/mixed code (Table 2) when there are multiple specific histologies or when there is a non-specific histology with multiple specific histologies

Note: The specific histology may be identified as type, subtype, predominantly, with features of, major, with ___ differentiation, architecture or pattern. The terms architecture and pattern are subtypes only for in situ cancer.

Rule H6  Code the histology with the numerically higher ICD-O-3 code.

This is the end of instructions for a Single Tumor: In Situ Carcinoma Only.
Code the histology according to the rule that fits the case.
**SINGLE TUMOR: INVASIVE AND IN SITU**  
(Both invasive and in situ components)

**Rule H7**  
Code the single invasive histology. **Ignore the in situ** terms.  
*Note:* This is a change from the previous histology coding rules and is different from ICD-O-3 rules. This change was made in collaboration with the ICD-O-3 editors. The consensus was that coding the invasive component of the tumor better explains the likely disease course and survival category.

This is the end of instructions for a Single Tumor: Invasive and In Situ Carcinoma.  
Code the histology according to the rule that fits the case.

**SINGLE TUMOR: INVASIVE ONLY**  
(All parts are invasive)

**Rule H8**  
Code the histology documented by the physician when there is no pathology/cytology specimen or the pathology/cytology report is not available.  
*Note 1:* Priority for using documents to code the histology  
- Documentation in the medical record that refers to pathologic or cytologic findings  
- Physician’s reference to type of cancer (histology) in the medical record  
- CT, PET, or MRI scans  
*Note 2:* Code the specific histology when documented.  
*Note 3:* Code the histology to 8000 (cancer/malignant neoplasm, NOS) or 8010 (carcinoma, NOS) as stated by the physician when nothing more specific is documented.

**Rule H9**  
Code the histology from a metastatic site when there is no pathology/cytology specimen from the primary site.  
*Note:* Code the behavior /3.

**Rule H10**  
Code 8140 (adenocarcinoma, NOS) for prostate primaries when the diagnosis is acinar (adeno)carcinoma.
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast,
Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule H11 Code the histology when only one histologic type is identified
*Note 1:* Do not code terms that do not appear in the histology description.
*Example:* Do not code squamous cell carcinoma non-keratinizing unless the words “non-keratinizing” actually appear in the diagnosis.
*Note 2:* If this is a papillary carcinoma of the thyroid, go to Rule H14.

Rule H12 Code 8210 (adenocarcinoma in adenomatous polyp), 8261 (adenocarcinoma in villous adenoma), or 8263 (adenocarcinoma in tubulovillous adenoma) when any of the following are true:
- The final diagnosis is adenocarcinoma in a polyp
- The final diagnosis is adenocarcinoma and a residual polyp or polyp architecture is recorded in other parts of the pathology report
- The final diagnosis is adenocarcinoma and there is reference to a residual or pre-existing polyp
- The final diagnosis is adenocarcinoma mucinous/colloid or signet ring cell adenocarcinoma in a polyp
- There is documentation that the patient had a polypectomy
*Note:* It is important to know that the adenocarcinoma originated in a polyp.

Rule H13 Code the most specific histologic term. Examples include:
- Cancer/malignant neoplasm, NOS (8000) and a more specific histology or
- Carcinoma, NOS (8010) and a more specific carcinoma or
- Squamous cell carcinoma, NOS (8070) and a more specific squamous cell carcinoma or
- Adenocarcinoma, NOS (8140) and a more specific adenocarcinoma or
- Melanoma, NOS (8720) and a more specific melanoma or
- Sarcoma, NOS (8800) and a more specific sarcoma
*Note:* The specific histology may be identified as type, subtype, predominantly, with features of, major, or with ___ differentiation. The terms architecture and pattern are subtypes only for in situ cancer.
*Example 1:* Adenocarcinoma, predominantly mucinous. Code mucinous adenocarcinoma 8480.

Rule H14 Code papillary carcinoma of the thyroid to papillary adenocarcinoma, NOS (8260).

Rule H15 Code follicular and papillary carcinoma of the thyroid to papillary carcinoma, follicular variant (8340).
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule H16  Code the appropriate combination/mixed code (Table 2) when there are multiple specific histologies or when there is a non-specific histology with multiple specific histologies

*Note:* The specific histologies may be identified as a type, subtype, predominantly, with features of, major, or with ____ differentiation.

**Example 1 (multiple specific histologies):** Mucinous and papillary adenocarcinoma. Code 8255 (adenocarcinoma with mixed subtypes)

**Example 2 (multiple specific histologies):** Combined small cell and squamous cell carcinoma. Code 8045 (combined small cell carcinoma)

**Example 3 (non-specific with multiple specific histologies):** Adenocarcinoma with papillary and clear cell features. Code 8255 (adenocarcinoma with mixed subtypes)

Rule H17  Code the histology with the **numerically higher** ICD-O-3 code.

This is the end of instructions for a Single Tumor: Invasive Carcinoma Only.  
Code the histology according to the rule that fits the case.

**MULTIPLE TUMORS ABSTRACTED AS A SINGLE PRIMARY**

Rule H18  Code the histology documented by the physician when there is no pathology/cytology specimen or the pathology/cytology report is not available.

*Note 1:* Priority for using documents to code the histology
  - From reports or notes in the medical record that document or reference pathologic or cytologic findings
  - From clinician reference to type of cancer (histology) in the medical record
  - CT, PET or MRI scans

*Note 2:* Code the specific histology when documented.

*Note 3:* Code the histology to 8000 (cancer/malignant neoplasm, NOS) or 8010 (carcinoma, NOS) as stated by the physician when nothing more specific is documented.

Rule H19  Code the histology from a metastatic site when there is no pathology/cytology specimen from the primary site.
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Note: Code the behavior /3.

Rule H20 Code 8140 (adenocarcinoma, NOS) for prostate primaries when the diagnosis is acinar (adeno)carcinoma.

Rule H21 Code 8077/2 (Squamous intraepithelial neoplasia, grade III) for in situ squamous intraepithelial neoplasia grade III in sites such as the vulva (VIN III) vagina (VAIN III), or anus (AIN III).
Note 1: VIN, VAIN, and AIN are squamous cell carcinomas. Code 8077 cannot be used for glandular intraepithelial neoplasia such as prostatic intraepithelial neoplasia (PIN) or pancreatic intraepithelial neoplasia (PAIN).
Note 2: This code may be used for reportable-by-agreement cases.

Rule H22 Code 8148/2 (Glandular intraepithelial neoplasia grade III) for in situ glandular intraepithelial neoplasia grade III in sites such as the pancreas (PAIN III).
Note: This code may be used for reportable-by-agreement cases such as intraepithelial neoplasia of the prostate (PIN III).

Rule H23 Code the histology when only one histologic type is identified.
Note: Do not code terms that do not appear in the histology description.
Example: Do not code squamous cell carcinoma non-keratinizing unless the words “non-keratinizing” actually appear in the diagnosis.

Rule H24 Code the histology of the underlying tumor when there is extramammary Paget disease and an underlying tumor of the anus, perianal region, or vulva.

Rule H25 Code 8210 (adenocarcinoma in adenomatous polyp), 8261 (adenocarcinoma in villous adenoma), or 8263 (adenocarcinoma in tubulovillous adenoma) when any of the following are true:
- The final diagnosis is adenocarcinoma in a polyp
- The final diagnosis is adenocarcinoma and a residual polyp or polyp architecture is recorded in other parts of the pathology report
- The final diagnosis is adenocarcinoma and there is reference to a residual or pre-existing polyp
- The final diagnosis is mucinous/colloid or signet ring cell adenocarcinoma in a polyp
- There is documentation that the patient had a polypectomy
Note: It is important to know that the adenocarcinoma originated in a polyp.
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule H26 Code papillary carcinoma of the thyroid to papillary adenocarcinoma, NOS (8260).

Rule H27 Code follicular and papillary carcinoma of the thyroid to papillary carcinoma, follicular variant (8340).

Rule H28 Code the single invasive histology for combinations of invasive and in situ. Ignore the in situ terms.

Note: This is a change from the previous histology coding rules and is different from ICD-O-3 rules. This change was made in collaboration with the ICD-O-3 editors. The consensus was that coding the invasive component of the tumor better explains the likely disease course and survival category.

Rule H29 Code the most specific histologic term. Examples include:
- Cancer/malignant neoplasm, NOS (8000) and a more specific histology
- Carcinoma, NOS (8010) and a more specific carcinoma
- Squamous cell carcinoma, NOS (8070) and a more specific squamous cell carcinoma
- Adenocarcinoma, NOS (8140) and a more specific adenocarcinoma
- Melanoma, NOS (8720) and a more specific melanoma
- Sarcoma, NOS (8800) and a more specific sarcoma

Note: The specific histology may be identified as type, subtype, predominantly, with features of, major, or with ___ differentiation. The terms architecture and pattern are subtypes only for in situ cancer.

Example 1: Adenocarcinoma, predominantly mucinous. Code mucinous adenocarcinoma 8480.

Rule H30 Code the appropriate combination/mixed code (Table 2) when there are multiple specific histologies or when there is a non-specific histology with multiple specific histologies.

Note: The specific histologies may be identified as type, subtype, predominantly, with features of, major, or with ___ differentiation.

Example 1 (multiple specific histologies): Gyn malignancy with mucinous, serous and papillary adenocarcinoma. Code 8323 (mixed cell adenocarcinoma)

Example 2 (multiple specific histologies): Combined small cell and squamous cell carcinoma. Code 8045 (combined small cell carcinoma)

Example 3 (non-specific with multiple specific histologies): Adenocarcinoma with papillary and clear cell features. Code 8255 (adenocarcinoma with mixed subtypes)
Other Sites Histology Coding Rules – Text
Excludes Head and Neck, Colon, Lung, Melanoma of Skin, Breast, Kidney, Renal Pelvis, Ureter, Bladder, Brain, Lymphoma and Leukemia

Rule H31  Code the histology with the **numerically higher** ICD-O-3 code.

This is the end of instructions for Multiple Tumors Abstracted as a Single Primary.
Code the histology according to the rule that fits the case.
