- 9140: Kaposi Sarcoma

Note 3: See the Urethra chapter for transitional cell (urothelial) carcinoma of the prostatic urethra (C680).

Note 4: Assign code 1 when there is only a TURP.

Note 5: Imaging is not used to determine the clinical extension unless the physician clearly incorporates imaging findings into their evaluation.

Note 6: If there is no information from the DRE, but the physician assigns a clinical extent of disease, the registrar can use that.

Example: DRE reveals prostate is "firm." Physician stages the patient as a cT2a. The T2a (localized) can be used since the physician has documented this.

Note 7: Involvement of prostatic urethra does not alter the Summary Stage code.

Note 8: "Frozen pelvis" is a clinical term which means tumor extends to pelvic sidewall(s) (code 7).
Note 9: When prostate cancer is an incidental finding during a prostatectomy for other reasons (for example, a cystoprostatectomy for bladder cancer), use the appropriate code for the extent of disease found.
